**March 25, 2016**

**Recent Advances in Understanding  
Word-Level Reading Problems**

## Recent Advances in Understanding Word-Level Reading Problems:

Assessment and Highly Effective Interventions

Empirical research on reading acquisition and reading disabilities over the last two decades has much to offer practicing school psychologists and other professionals working in schools. Research on orthographic memory (how we remember the words we read) sheds light on the nature and causes of word-level reading disabilities.

Participants will learn how to identify why students struggle in reading. Research will be presented that shows that most reading difficulties can be prevented and corrected.

### Presenter

David Kilpatrick received his PhD in school psychology from Syracuse University in 1994. He has been a practicing school psychologist with the East Syracuse-Minoa School District since 1989. He has taught courses in learning

disabilities and educational psychology for the State University of New York, College at Cortland since 1994, where he has worked full time since 2006.

He has completed over 1000 evaluations on students with reading difficulties and disabilities. Also, he has conducted research studies on reading with hundreds of both typically developing reading and struggling readers. Dr. Kilpatrick is the author of *Essentials of Assessing, Preventing, and Overcoming Reading Difficulties* (2015) and *Equipped for Reading Success: A Comprehensive, Step-by-Step Program for Developing Phonemic Awareness and Fluent Word Recognition* (2015).
